OMEGA's OM-EL Series is a family of portable data loggers with up to 12 bit accuracy and resolution.

OM-EL Series data loggers feature a high contrast LCD display, up to 3 years battery life, adjustable sampling rate (variable between 5 seconds and 12 hours), data storage up to 8000 readings, alarm modes, delayed, automatic or push to start. The 8 bit (256 steps) model has an integral sensor, making temperature measurements particularly easy.

Ideally suited for incorporation into new and existing measurement systems, readings can be stored and processed in the panel meter, allowing full control of the monitored process.

The OM-EL-WIN Windows compatible software (Windows 98/NT/2000/XP) ensures an effortless set-up of one or more of the OM-EL Series data loggers modules and controls the transfer of logged data to the PC for further analysis.

Although perfectly suited to self powered applications, up to eight OM-EL Series data loggers modules can be linked together in a network to form a complete control and measurement system.

Model OM-EL-2, enclosed portable data logger, \$239, shown smaller than actual size

OMEGACARESM extended warranty program is available for models shown on this page. Ask your sales representative for full details when placing an order. OMEGACARESM covers parts, labor and equivalent loaners.

Physical Specifications

Model Number	OM-EL-2 OM-EL-2-12BIT
Dimensions	2.12 H x 2.75 W x 1.02" D (54 x 70 x 26 mm)

Designed to perform simple or sophisticated data logging with the minimum of cost and complexity, the logger has a built-in LCD display and an internal battery which can last up to 3 years, depending on sample rate and parameters being measured. Sample intervals are user-variable between 5 seconds and 12 hours with a maximum capacity of over 8000 readings.

Easy to install on a Windows 98/NT/2000 or XP platform, the OM-EL-WIN Easy Log control software is needed to enable the user to configure and operate any OM-EL data logger and is supplied on a 3½ disk with a manual and serial link cable. Allowing up to eight loggers to be operated as a network, the OM-EL-WIN software includes

automatic prompting for ease of use, a mimic mode which allows remote indication on the PC, extensive graphing facilities and the facility to export data directly into popular spreadsheets such as Excel.
