Pre-Cut Panel Kits

These front panels are 2 mm (0.090") thick aluminum and are pre-cut for up to 4 DIN size controllers, depending on the size of the enclosure. The kits are simple to assemble requiring drilling three holes with the provided template. All stainless steel hardware is included along with installation instructions. These kits are available for two NEMA 4X fiberglass enclosure models, 0.3 H x 0.25 W x 0.15 m D (12 x 10 x 6") and 0.40 H x 0.35 W x 0.20 m D (16 x 14 x 8"). Rear sub-panels are also available for mounting additional electrical components.

Enclosures

OM-AMU series non-metallic fiberglass enclosures are designed to insulate and protect electrical controls and components in both indoors and outdoors applications and are especially well suited for higher temperatures and corrosive environments. These NEMA 4X (IP66) fiberglass JIC junction boxes feature clear polycarbonate covers with a variety of screw or latching options.
