The OM-CP-TEMP1000S temperature logger is a rugged, waterproof, battery powered, stand-alone device used for automatically recording temperatures from -40 to 150°C (-40 to 302°F). This all-in-one compact, portable, easy-to-use device will measure and record up to 32,767 temperature measurements. It includes a 1" rigid external probe and is ideal for use in harsh environments.

The OM-CP-TEMP1000S is a major leap forward in both size and durability. Its real time clock ensures that all data is time and date stamped. The storage medium is non-volatile solid state memory, providing maximum data security even if the battery becomes discharged. Its small size allows it to fit almost anywhere. Data retrieval is simple. Plug it into an available COM port and the easy-to-use Windows software does the rest. The software converts your PC into a real time strip chart recorder. Data can be printed in graphical or tabular format and can also be exported to a text or Microsoft Excel file.
