Compression fitting (e.g., SSLK-14-14) shown on tube, sold separately. All products shown smaller than actual size.

**MOST POPULAR MODELS HIGHLIGHTED!**

OMEGA® miniature and standard protection tubes are available in 316 stainless steel and Inconel 600 nickel alloy. Tubes are available either opened at both ends or with one end closed. Standard length available from stock is 150 mm (6"); however, practically any length tube is available on short delivery.

OMEGA's protection tubes are intended for use with OMEGA's fine or heavy gage thermocouples and ceramic insulators, as well as OMEGA's standard thermocouples made from OMEGACLAD® thermocouple wire. These items are shown in Section A of this catalog. Bare wire thermocouples can be insulated using OMEGATITE® ceramic insulators as well as the insulators used in replacement elements.

OMEGA's protection tubes can be conveniently secured into pipes, vessels, and chambers by using OMEGALOK® compression fittings.
